Elog - Support #14605

HTTP API /api/get/entries Appears broken

11/22/2016 05:10 PM - Michael Wren

Description

It may be my incompetence, but I can't get the new HTTP API to work. Previously I was able to do a GET to:
https://www-bd.fnal.gov/Elog/getEntries?logName=Operations
And have it return the 100 most recent Operations log entries in JSON format.

I updated my call for the new API with my best guess as the wiki page hasn't been completely updated:
https://www-bd.fnal.gov/Elog/api/get/entries?orLogName=Operations
And then I get the following error: "Message: Entry ids must be specified." and a HTTP 400 response

I don't expect this error as I think I should be able to just ask for the most recent entries the way I have and get them back without specifying any entry IDs.

History

- Tracker changed from Bug to Support

- Category set to Server

- Status changed from New to Feedback

- Target version set to Version 2.0

Yeah. Sorry, the wiki isn't up to date yet.
Try replacing "get" with "search". Get requires entry ids.

Thanks for the fast feedback, that seems to work.
